

Earn Your M.A. in Math Education

This program is designed for **California math teachers** who possess a bachelor's degree in mathematics and are interested in qualifying to teach dual-enrollment courses in their high schools or work as adjunct instructors in a community college.

Courses cover a range of mathematics topics such as advanced algebra, geometry and calculus. The program includes courses like Teaching Math for Social Justice and Data Science. Students will read the research in math education and complete a series of three comprehensive exam papers embedded in the coursework.

Program Highlights:

- ▶ Cohort of 25-30 students
- ▶ Two cohorts beginning Spring 2023 and Fall 2023
- ▶ Five semesters total with two 3-unit courses per semester
- ▶ Courses in the spring, summer and fall
- ▶ Synchronous class meetings on Tuesdays from 5:15-9:00 p.m.
- ▶ Two hours of asynchronous reading and assignments per class
- ▶ Majority of tuition costs covered by the generous funding from Kern's Regional K16 Education Collaborative
- ▶ Rich and rigorous content, equity and technology training will better prepare you to serve your students
